- What sort of organisations use your services?
- How can I compare the different Health, Safety and Environmental qualifications?
- What are some of the most common professional HSE qualifications?
- HSE professional membership bodies, where can I find further information?

Can you advise me on the level of experience and qualifications my company needs in an H&S Manager or H&S Advisor?

Yes! With experience and qualifications in both recruitment and Health and Safety our staff are perfectly positioned to advise you on all aspects of HSE recruitment. Why not give us a call and find out how we can help you?

Which Industry sectors do you work with?

We provide Health, Safety and Environmental recruitment services across a broad range of industries, including: Building Services, Civil Engineering, Construction, Consultancy, Engineering, Environmental Services, Facilities Management, Catering and Food Safety, Housing, Leisure, Logistics, Manufacturing, Not for Profit organisations, Office and Corporate, Oil and Gas, Public Sector, Renewable Energy, Retail, Utilities and Energy, Training, Transport and one of our most popular, Travel.

What types of recruitment services do you offer?

New Level Recruitment offers a range of Health, Safety and Environmental recruitment solutions including Permanent recruitment on a contingency or search and selection basis, Interim placements and Contract or Temporary staff.

Which geographical area do you cover?

Like us, the majority of our vacancies are based in the UK but we have candidates registered worldwide for positions throughout the UK and overseas.

I'm looking for an HS&E Consultant with specialist experience, can you help?

Yes! We have consultants (and people seeking permanent roles) available to provide expert advice on specialist Health, Safety and Environmental issues such as Marine Safety, Asbestos Management, Fire Safety, CDMC / Construction Safety, Training, Food Safety, Auditing, Renewable Energy, Sustainability and Crisis Management, just to name a few.

What qualifications and experience do I need to register with New Level?

To register on New Level Recruitment's HSE database you must hold a minimum of a Level 3 Health, Safety and Environmental qualification and have at least 6 months experience in a dedicated Health, Safety and Environmental role.

What type of organisations use your services?

All sorts! We work in partnership with both the public and private sectors and our diverse client base ranges from growing Consultancies and SMEs to some of the UK's largest and best known companies.

How can I compare the different Health, Safety and Environmental Qualifications?

There are so many different Health, Safety & Environmental qualifications and professional memberships in the UK even people working in the profession can get confused!

The most common HSE qualifications are graded according to the level of depth of knowledge they represent. Generally speaking, Level 1 to 2 qualifications (such as IOSH Working or Managing Safely) help people understand their responsibilities in the workplace. Level 3 qualifications are aimed at managers, supervisors and employee representatives who require the knowledge in order to carry out their Health and Safety duties more effectively. And Level 4 to 6 qualifications are designed for people seeking a professional career in Health and Safety.

Please note that in Health and Safety, relevant experience can be just as important as qualifications, and there are some very experienced and able HS&E professionals in the industry who hold very few qualifications at all!

What are some of the most common professional HSE qualifications?

QCA Level	Qualification
Level 3	British Safety Council Level 3 Certificate in Occupational Safety & Health (CertOSH) CIEH Advanced Health and Safety Certificate / Level 3 Award in Health and Safety in the Workplace NEBOSH National General Certificate in Occupational Health and Safety NEBOSH National Certificate in Construction Health and Safety NEBOSH International General Certificate in Occupational Safety and Health NEBOSH Fire Safety and Risk Management Certificate NVQ / SVQ Level 3 in Occupational Health and Safety Practice
